

**Nick Reynolds, BSc MBBS MD FRCP
Newcastle upon Tyne, England, UK**

Nick Reynolds is professor of dermatology in Newcastle upon Tyne, UK. His clinical and research interests are centred on atopic eczema, psoriasis, human models of skin disease, systems biology and precision medicine. He runs a dedicated tertiary referral clinic for adults with atopic eczema. His group published one of the first stratified medicine studies in dermatology, a randomized controlled trial (RCT) of azathioprine in atopic eczema that utilised pharmacogenetic-based dosimetry.

Between 2016 and 2019, Dr. Reynolds was director of Newcastle's MRC/EPSRC Molecular Pathology Node, one of six units established in the UK to bring researchers, clinicians, and industry together to develop molecular diagnostic tools for personalized medicine. He was the inaugural Chair of UK TREND (Translational Research Network in Dermatology) and is past president of the European Society for Dermatological Research (ESDR) and the European Dermatology Forum (EDF). He is an IEC and IPC Councilor and former IEC Board member. He co-leads the IEC Education Committee, is co-author of the atopic eczema chapter in *Rook's Textbook of Dermatology*, and has contributed widely to educational and mentorship events, particularly focused on trainees. He has received a number of honours and awards, including the Rudi Cormane and the Eugene M. Farber lectureships, and was selected as an NIHR Senior Investigator in 2019.

After qualifying in medicine from the University of London, he received his dermatology and academic training in Bristol; Ann Arbor Michigan, USA; and Newcastle upon Tyne.
